

PROJECT

INTERACTIVE MANUFACTURING QUALITY DASHBOARD

Prepared by:
Ravi Singh Bisht

Portfolio:
<https://github.com/RaviB11>

Main Dashboard: Key Performance Indicators

The main dashboard provides an immediate, at a glance summary of plant wide production quality, tracking total units, overall defects and the real time defect rate

Root Cause Analysis: Isolating Problem areas

The dashboard is fully interactive. Here, by filtering for the highest-defect product grade ('L'), manager can instantly see that it is the primary source of quality issues.

Comparative Analysis: Segment Performance

Further analysis of other product grades ('M') is just one click away, allowing for rapid comparison and resource allocation to the areas with the most need.

Comparative Analysis: Segment Performance
